

# Jarraff 20" & 24" Tree Trimming Saw Blades

(Every year, we sell more and more tree trimming blades to the tree service industry.)

Popular Tools now manufactures 20" tree trimming blades specially designed for the Jarraff tree trimming machines. We have been manufacturing the 24" blades for over 14 years. Now, we have the 20" blade for added convenience.

You can order our tree trimming blades, deliver to your customers, and get paid by them faster than you could receive the plates from your plate supplier. Popular Tools does not mass-market our product, nor do we sell directly to end-users.

We also offer drop ship service at no extra service charge. A growing number of our distributors are taking advantage of this service. Because of this service, you can fill your customer's order and collect your money faster!

Size	Teeth	Kerf	Plate	Bore	Tooth Design	Hook	Item ID	List Price
20"	60T	.236"	.150"	1-1/2"	ATB	10	JARF2060X	\$340.00
